Course Description

This course describes and analyzes some of the main issues in the Israeli Politics and Society through a Historical overview of more than 100 years, from the end of the 19th century to this day. The course is organized into four parts: The first part establishes the historical background of the Zionist movement from 1881 to 1948 and focuses on the Yeshuv as an Emerging state. The second part examines the process of the Israeli nation building from its establishment in 1948, until the 1967 war, and describes the mass immigration, and the creation of Israeli Democracy. The third part deals with the "normalization" of the life in Israel between 1967 and 2000, years of great development combined with wars and dramatic political changes. The fourth part examines the challenges facing the Israeli State and the whole Zionist project at the beginning of the 21st century.
